*WHAT TO DO ABOUT
YOUR BRAIN-INJURED CHILD™*
COURSE

APPLICATION FOR ENROLLMENT

July 2013
European Application

THE *WHAT TO DO ABOUT YOUR BRAIN-INJURED CHILD* COURSE

Eligible to take the course are all parents who believe that their hurt children have a greater potential than they are presently using and who wish to learn more about ways of helping their brain-injured children to achieve their potential. No academic degree is required. Enrollment is limited to eighty students.

Years of preparation and experience have gone into the course. Every moment is used to give the greatest amount of information to the parents attending the course. It is only possible for the vast amount of information covered to be presented in such a short period of time in atmosphere totally free of distractions. For this reason, it is not possible for children to attend the course. Enrollment is therefore only available to parents who are able to leave their children at home in loving and competent hands.

All parents attending every session of the course will receive certification in Human Development at the Initial Parent Level. This certificate qualifies parents to use the knowledge gained during the week with their own children. It does not qualify parents or professionals to teach anyone else.

This course is designed for the parents of *children*. However, The Institutes have over fifty years of experience with brain-injured *adults*. The course contains invaluable information that is beneficial to brain-injured adults. Therefore, relatives of brain-injured adults are permitted to attend the course.

There are two payments for the course. One is for tuition for the course. This is paid to Philadelphia in U.S. dollars. The second is for the expenses for presenting the course in Europe. This is paid to Fauglia in Euros.

The tuition for Philadelphia is \$1160.00 per person, or \$ 1850.00 per couple if mother and father attend the same course together. The expenses payment for Fauglia is 685 Euros for one parent and 1370 Euros for two. Full expenses payment (or a deposit of 250 Euros per person) is required at the time of enrollment to secure your place in the course. The full payment must be received by The Institutes in Fauglia and Philadelphia no later than one month prior to the course. Please read the enclosed letters that explain payment to Philadelphia and Fauglia.

Information about local accommodations and transportation will be sent with confirmation of your enrolment. Please complete the application for enrolment and mail it to:

On this page, please write a complete description of your child's developmental since birth with as much information as possible about the pregnancy and delivery. Please write this in your own words, not copied from a professional report. Please include a recent photo of your child.

STATEMENT OF GOALS AND OBJECTIVES

The *What To Do About You Brain-Injured Child* Course is a course designed solely for parents. The objective of this one-week course is to teach the principles of Child Brain Development to parents so that those who wish to do so can design their own child development program at home. It does not qualify a parent to instruct other children, other parents, or professionals in the work of The Institutes for the Achievement of Human Potential®. The goal of this course is to create better children, and therefore better adults, through parents.

We trust that parents attending this course will understand the importance of the objectives of this course and appreciate what it does, and does not, qualify them to do when they have completed it.

This course is designed to teach principles. It is not designed to teach or propose a specific program for any of the children whose parents attend. Indeed, The Institutes® will not have ever seen, evaluated, or made a diagnosis for any of the children whose parents attend this course. For this reason the staff will not prescribe any program whatsoever. Nor can The Institutes® take any responsibility for children who have never been seen here.

It is absolutely vital that parents attending this course understand that they take full responsibility for their child's program and development, and, further, that The Institutes® do not by implication or promise guarantee that the application of the program will cure a child.

I have read and understood this "Statement of Goals and Objective" of this course and agree that I am fully responsible for my child's program and development, and that attending does not qualify me to teach anyone but my own children. I agree to use this information only to teach my own children. I will not use the information from this course to teach other children, or to instruct other parents or professionals in the work of The Institutes®. This commitment is critical to the understanding between The Institutes and me. Nothing in this "Statement of Goals and Objective" grants any other license or rights in the work of The Institutes®.
